FOREWORD	11
INTRODUCTION	13

PART I **PERFORMANCE, QUALITY AND IMPACT OF THE HEALTH WORKFORCE**

EDUCATION, TRAINING AND PROFESSIONAL DEVELOPMENT TO DELIVER PEOPLE-CENTERED CARE	25
1. Introduction: the <i>status quo</i> cannot meet current systemic challenges or new expectations	25
2. People-centred care requires additional skills	27
2.1. Building resilience and adaptability through transversal skills	27
2.2. Working in technically complex environments requires skills for handling complex tasks	28
2.3. Routine tasks – improving productivity directly	29
2.4. Complex tasks – the transformative impact of Artificial Intelligence and Big Data	30
2.4. The human-machine interface combines High Tech with High Touch	31
2.5. Developing team resilience and support requires skills for creating a positive work culture	33
2.6. Managing complex personal relations requires skills for providing personalized care	34

3.	Educational implications of future jobs for today's health workforce	35
3.1.	Harnessing digital technology and automation in education and training	35
3.2.	Integrating Human-Centred Design approaches into education and training	37
3.3.	Facilitating inter-professional collaboration and multi-disciplinary education	38
3.4.	Sustaining lifelong learning and flexible career progression	39
4.	Conclusion	42
	References	43
	SKILL-MIX CHANGES AND ADVANCED PRACTICES IN HEALTH	49
1.	Introduction: skill-mix changes for improving health systems performance	49
2.	Theoretical foundations	50
2.1.	Skill-mix and tangential concepts	50
2.2.	Skill-mix taxonomies	52
2.3.	Assessment of the workforce skill-mix	54
2.4.	Drivers for change	55
2.5.	Barriers and facilitators	56
3.	Evidence on skill-mix changes	58
3.1.	Nurses and doctors	58
3.2.	Other health professionals	61
4.	Implementation approaches to skill-mix changes	63
4.1.	Implementation cycle	63
4.2.	Sociological approach to skill-mix implementation	65
5.	Conclusion	65
	References	66
	DEPLOYMENT, RETENTION AND MOBILITY OF HEALTH PROFESSIONALS	71
1.	Introduction	71
2.	Deployment	72
2.1.	What is deployment?	72
2.2.	Types of deployment models	72
2.3.	Measuring deployment	73
2.4.	Evidence on the deployment of health professionals	74
3.	Retention	75
3.1.	What is retention?	75
3.2.	Types of retention interventions	75

3.3. Measuring retention	76
3.4. Evidence on the retention of health professionals	77
4. Mobility	79
4.1. What is mobility?	79
4.2. Types of mobility	79
4.3. Measuring mobility	81
4.4. Evidence on health professional mobility	81
5. Conclusion	84
References	84

ECONOMIC IMPACT OF HUMAN RESOURCES

IN HEALTH SYSTEMS	87
1. Why should we be concerned about HR in Healthcare?	87
2. Do HR policies impact health outcomes?	91
3. Do HR policies impact health costs?	96
4. What have we learned?	99
References	100
Appendix	102

**PART II
INVESTMENT IN HRH AND FUTURE
NEEDS OF POPULATION AND
HEALTH SYSTEMS**

ECONOMIC DEVELOPMENT, INVESTMENT IN HEALTH AND THE HEALTH MARKET	107
1. Introduction	107
2. The rise of the health economy	109
3. Health economy's contribution to economic growth	110
4. Health economy's contribution to social development	113
5. Policy context	114
6. Conclusions	115
References	116

PLANNING THE FUTURE HEALTH WORKFORCE	119
1. Introduction	119
2. Review of the literature	120
3. The medical and nursing workforce	123
3.1. Evolution of the Portuguese physicians and nurses	123

3.2. A roadmap of public policies for human resources for health in Portugal	124
4. Method	126
5. Results	128
5.1. Physicians and nurses	128
5.1. Medical specialists	131
6. Conclusions and further research	132
Acknowledgments	135
References	135
Technical Annex	138

PART III
EFFECTIVE PUBLIC POLICY STEWARDSHIP,
LEADERSHIP AND GOVERNANCE

GOVERNANCE ISSUES IN THE DEVELOPMENT OF THE HEALTH WORKFORCE	145
1. Introduction	145
2. Making connections between governance and the health workforce	147
2.1. The concept of governance	147
2.2. Professions, professionalism and organisations	149
2.3. Assessing the governance of human resources for health	152
3. Researching and operationalising health workforce governance	154
4. Exploring the governance of innovation in human resources for health: a European comparative case study	155
5. Conclusions	160
Acknowledgements	161
References	161
FLEXIBILITY IN EMPLOYMENT: WORK, WORKING CONDITIONS, AND DUAL PRACTICE	167
1. Introduction	167
1.1. The health professions and social closure	168
1.2. The health professions and new managerial requirements	169
2. Drivers of health workforce flexibility	170
2.1. Changes to health workforce demand and need	171
2.2. Changes to supply	173
2.3. Health workforce distribution	175

3. Enablers of health workforce flexibility	175
3.1. External numerical flexibility	175
3.2. Internal numerical flexibility	177
3.3. Functional flexibility	179
3.4. Locational flexibility	181
3.5. Wage flexibility	181
4. Conclusion	183
References	184

PART IV

STRENGTHENING INFORMATION SYSTEMS ON HRH

NATIONAL HEALTH WORKFORCE ACCOUNTS	195
1. Introduction	195
2. National Health Workforce Accounts – why?	196
3. National Health Workforce Accounts & health labour market framework	198
4. National Health Workforce Accounts indicators	200
5. Data sources and triangulation	202
6. National Health Workforce Accounts implementation	206
7. Data dissemination and use	210
8. The way forward	213
References	213
KEY MESSAGES AND WAY FORWARD	217
